

UNIMOBILE

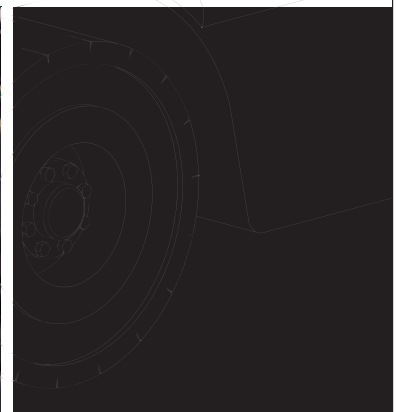

PDA software, for offline data capture and transfer to PC

BENEFITS

- Connecting RAVAS scale with a PDA
- UniMobile dialogue guides the user
- For Windows Mobile/CE PDA's

Easy connectivity

Efficient data capture

RAVAS

FUNCTIONS

- Runs on Windows Mobile/CE 5.0 or higher
- Registering weight data on PDA in CSV-file format
- Registering additional information, such as customer number, order number, article code, etc.
- Standardized variables, such as tare weights for containers, may be selected from predefined lists
- Transfer of CSV-data file to PC via USB cable

HOW UNIMOBILE WORKS

UniMobile is PDA software for offline data capture and periodical transfer to a PC. On a PDA that communicates with a RAVAS scale via Bluetooth, UniMobile lets you configure a simple dialogue that helps the truck operator record information on the pallet or container being handled, together with the weight. All information is saved in a CSV-file on the PDA. At the end of the day the PDA is connected to a PC via USB cable and the CSV-file is transferred. On the PC the data file can be opened in Excel, where the data can be processed. The combination of a RAVAS weighing system and a Windows PDA offers many possibilities for capturing information on material flows, during order picking, production processes, goods reception, waste monitoring or loading freight trucks.

INSTALLATION ON PDA

UniMobile software is configured for the application in dialogue with the user. If the complete package of weighing system, PDA and UniMobile software is supplied by RAVAS, then the systems are delivered fully functional. If the user chooses to install UniMobile software on a PDA not supplied by RAVAS, then installation is the responsibility of the user.

STANDARD SPECIFICATIONS

- System requirements Windows Mobile or Windows CE, version 5.0 or higher on PDA
- Hardware connection via serial RS232 port or Bluetooth connection
- Standard languages English, German, French, Italian and Dutch (other languages on demand)

PREMIUM OPTIONS*

- Thermal printer, linked to the PDA via Bluetooth to print UniMobile data locally
- UniSync software for synchronizing of CSV-files between UniMobile and a network PC via WLAN

OPTIONS*

- PDA or handheld terminal supplied by RAVAS
- Installation of UniMobile on your PDA by RAVAS
- Development of customer specific software, e.g. article lists with standard data

* The use of options may change related specifications.
