

Uniwin configurations

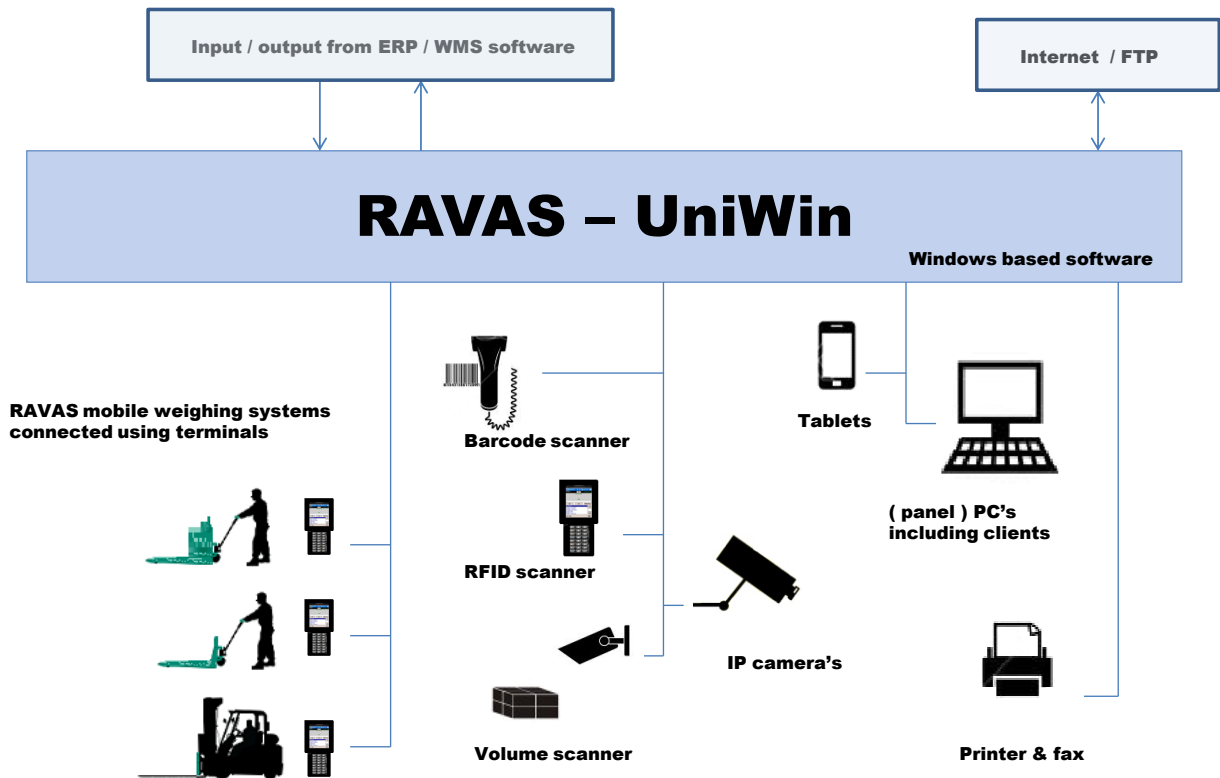

On Line – with RAVAS scales

On Line – without scale

Note: we need 100% WLAN coverage in the area's where the PDA/Terminals will have to work. The RAVAS weighing systems are usually connected to the Terminal by Bluetooth

UniWin layout

UniWin can read product database information from an ERP system
 UniWin can read production orders from an ERP system
 UniWin does not need to control the actual stock levels in the warehouse

UniWin will work on the factory floor (warehouse) and execute a predefined work flow for Goods Entry actions and for Goods Outward actions (order picking)
